FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce"

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every censal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items

Age

Sex

Marital Status

Highest Grade Completed

Literacy

Language/Dialect Spoken in the

Household

Gainful and Non-Gainful Occupation

Major and Minor Industry

Migration

Housing Items

Type of Building

Type of Occupancy

Construction Materials of Roof and Outer

Walls

Year Built

Floor Area of Dwelling Unit

Tenure of Owner-Occupant with Respect

to the Land

Kind of Lighting Facilities

Use and Source of Water Supply

Type of Toilet Facilities Kind of Cooking Fuel Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I - POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- 1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions;
 (2) in mental hospitals;
 (3) in leprosaria or leper colonies; and
 (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- 1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- 1. Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married

 Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II - HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

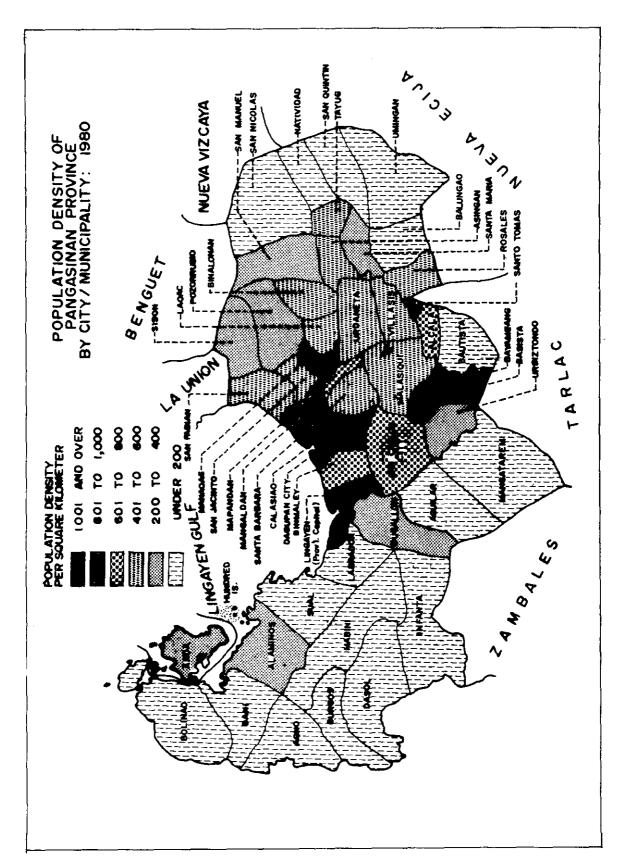

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Area of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway was excluded in determining the floor area.

Pangasinan: A Brief Analysis

Pangasinan, one of the seven provinces comprising Ilocos Region, is situated in the northern portion of the vast central plains of Luzon. Its boundaries include Lingayen Gulf, La Union and Benguet on the north, Nueva Vizcaya on the northeast, Nueva Ecija on the east, Tarlac on the south, Zambales on the southwest, and the China Sea on the west. Sprawling ricefields and other cultivated plains, extending from the foot of the Caraballo Mountains to Nueva Ecija and Tarlac, characterize its terrain making the province one of the country's top rice producers.

Among the famous landmarks in Pangasinan are the Hundred Islands in Alaminos, the Our Lady of the Most Holy Rosary of Manaoag Church in Manaoag and the Lingayen Beach McArthur Landing in Lingayen.

The province is now composed of 46 municipalities (with the creation of a new municipality named Laoac) and 2 cities, and has for its capital the municipality of Lingayen.

POPULATION

The 1980 provincial population was registered at 1,636,057, of which 814,285 were males and 821,772 were females. Pangasinan remains third, population-wise, among the 73 provinces despite a 0.38 percentage point decrease in its annual geometric growth rate from 1.86 percent in 1975 to 1.48 percent. The province occupies a land area of 5,368.2 square kilometers or 1.8 percent of the country's total land area and each square kilometer was populated by 304.8 persons, the densest in Ilocos region.

Despite a continuing increase in the number of urban population, a greater percentage (73.49%) of the population was still composed of the rural population.

The sex ratio (number of males per 100 females) of the population in general decreased by 1.10 percentage points from 100.19 in 1975 to 99.09 but less pronounced than 1970's 97.79. Both the urban and rural population followed the up-and-down trend. The urban sex ratio was 93.10 in 1970, then upped to 96.04 in 1975 and finally dropped to 95.38. For the rural sex ratio, it was 98.98 in 1970 then rose to 101.46 in 1975 and down to its present ratio of 100.46.

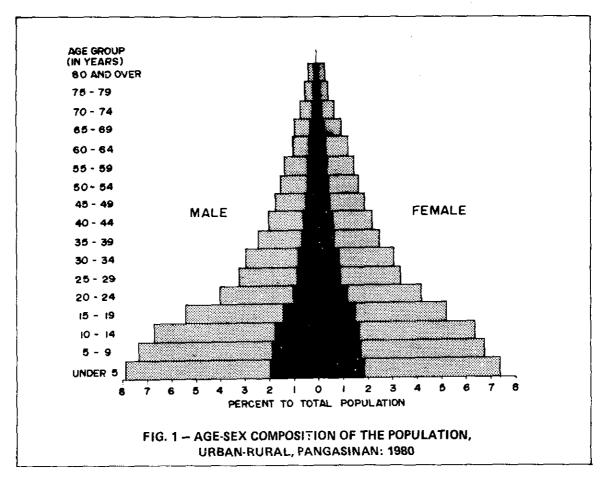

Table 2 and Figure 1 provide a picture of the distribution of the population by age group and sex. As observed, a pyramid-like structure forms in the graph with the males and females below five years old forming a broad base which gradually declines as the group grows older, and the 80 years old and over forming the apex. Significantly, this pattern holds true in both the urban and rural areas where both the male and female population decrease as the persons grow older.

Classified according to urban-rural residence and sex, the breakdown of the population of Pangasinan for the three censal years in review is shown in Table A:

A BRIEF ANALYSIS

TABLE A – URBAN-RURAL POPULATION BY SEX, PANGASINAN: 1970, 1975 AND 1980

Area Classification	19	80	19	975	1970		
and Sex	Number	Percent	Number	Percent	Number	Percent	
Total	1,636,057	100.00	1,520,085	100.00	1,386,143	100.00	
Male Female	814,285 821,772	49.77 50.23	760,763 759,322	50,05 49,95	685,342 700,801	49.44 50.56	
Urban	433,806	26.51	348,724	22.94	272,492	19.66	
Male Female	211,780 222,026	12.94 13.57	170,844 177,880	11,24 11,70	131,377 141,115	9.48 10.18	
Rural	1,202,251	73.49	1,171,361	77.06	1,113,651	80.34	
Male Female	602,505 599,746	36.83 36.66	589,919 581,442	38.81 38.25	553,965 559,686	39.96 40.38	

AGE COMPOSITION

Persons in the younger ages (0-14 years) comprised 42.38 percent of the population. This group demonstrated a downward trend during the last 10 years. However, persons in the productive age group increased by 0.22 percentage point between 1975 and 1980, accounting for 52.67 percent of the provincial population. Likewise, the proportion of elderly persons (65 years and over) is on the rise. From 3.98 percent in 1970, it rose to 4.14 percent in 1975 and increased further to 4.95 percent.

A comparison of the age composition of the population in three censal years is shown below:

TABLE B –AGE COMPOSITION OF THE POPULATION, PANGASINAN: 1970, 1975 AND 1980

A	19	1980		75	1970		
Age Composition	Number	Percent	Number	Percent	Number	Percent	
Total	1,636,057	100.00	1,520,085	100.00	1,386,143	100.00	
0 – 14 years	693,301	42.38	659,792	43.41	617,867	44.57	
15 - 64 years	861,744	52.67	797,331	52.45	713,101	51.45	
65 years and ov	ver 81,012	4.95	62,962	4.14	55,175	3,98	

The present population of Pangasinan may be described as relatively "young" with its median age at 18 years and its aged-child ratio (number of elderly persons 65 years and over per 100 children 0-14) at 11.68.

The increase in the percentage of persons in the productive age coupled by the corresponding decrease in the percentage of persons 0-14 years brought about a decrease in the dependency ratio. In 1975, 90.65 dependents were being supported by 100 working populace and in 1980, the dependency ratio dropped to 89.85.

The rural workers were more heavily burdened than their urban counterparts, the former supporting 91.34 dependents while the latter had 85.86.

MARITAL STATUS

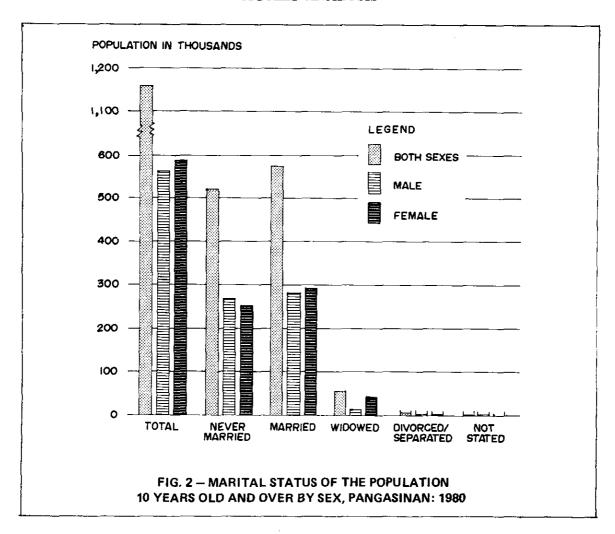

Percentage-wise, never married persons sustained a downward trend in the last five years from 48.35 percent to 45.11 percent despite a 1.34 percent increase in their number from 514,601 individuals to 521,475. On the other hand, married, widowed, divorced or separated persons and those who did not reveal their civil status did otherwise. Married persons increased from 47.30 percent to 49.62 percent; widowed, from 4.06 percent to 4.79 percent; divorced or separated ones upped by 0.14 percentage point with 0.41 percent and those who did not disclose their status incremented negligibly by 0.05 percentage point to put their proportion at 0.07 percent.

The males and females exhibited different trends in the three censal years under review. In 1970 and 1975, the never married group constituted the greatest percentage of the male population, 50.26 percent and 50.81 percent, respectively. However, the proportion dropped to 47.45 percent in 1980 enabling the married group to get the lion's share of the male population. In sharp contrast, married ones have always prevailed among the females and the corresponding proportion also increased, that is, 46.77 percent in 1970, 47.65 percent in 1975 and 49.54 percent in 1980. Also, women were more likely to get widowed and divorced or separated than men. In 1980, widowed and divorced or separated males made up 2.52 percent and 0.28 percent, respectively, of the total males, whereas, the respective proportions for the females were 6.98 percent and 0.52 percent.

The succeeding table summarizes the distribution of population 10 years old and over of Pangasinan by sex and marital status for the censal years 1970, 1975 and 1980:

TABLE C – POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, PANGASINAN: 1970, 1975 AND 1980

	198	30	197	75	1970		
Sex and Marital Status	Number	Percent	Number	Percent	Number	Percent	
Both Sexes	1,155,962	100.00	1,064,361	100.00	959,663	100.00

Not stated	564	0.10	171	0.03	530	0.11	

HIGHEST GRADE COMPLETED

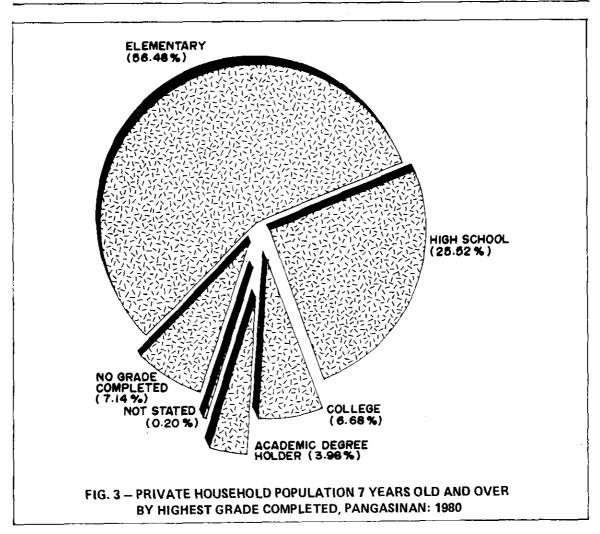

Pangasinan folks have come to realize and feel the need for higher education in the upliftment of their socio-economic condition. This behavior was manifested in the increased proportion of those who went through the secondary level (21.65% to 25.52%), collegiate level (5.01% to 6.68%) and of those who were academic degree holders (3.32% to 3.98%) and the corresponding decrease in the proportion of those who completed the elementary level (60.18% to 56.48%) and of those who had not completed any grade (8.51% to 7.14%). Likewise, those who did not disclose their educational attainment declined in proportion, from 1.33 percent to 0.20 percent.

The females registered a higher proportion of academic degree holders (4.82%). However, they also registered higher proportions of persons with elementary background (57.92%) and persons without formal schooling (8.09%). The males, on the other hand, registered higher proportions of college schoolers (6.93%) and high schoolers (28.61%) and lower proportions of persons who only reached up to elementary level (5..99%) and of those with no educational background whatsoever (6.16%). Both sexes had nearly the same proportion of persons who kept silent about their educational achievement (0.20%, male; 0.21%, female).

The distribution of the private household population 7 years old and over according to highest grade completed in the last two censal years is shown in the following table:

TABLE D — PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, PANGASINAN: 1975 and 1980

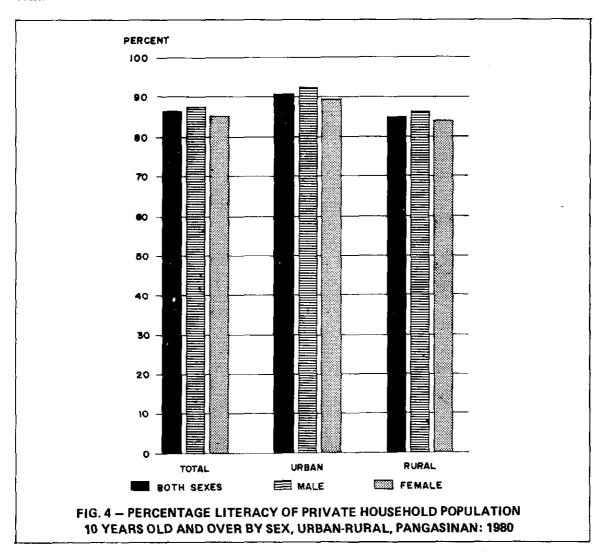

W C	19	80	1975		
Highest Grade Completed	Number	Percent	Number	Percent	
Total	1,294,815	100.00	<u>1,193,866</u>	100,00	
No grade completed	92,415	7.14	101,570	8.51	
Elementary grade	731,262	56.48	718,474	60.18	
High school	330,490	25,52	258,509	21.65	
College undergraduate	86,444	6.68	59,758	5.01	
Academic degree holder	51,542	3.98	39,646	3,32	
Not stated	2,662	0.20	15,909	1.33	

LITERACY

The literacy rate for the private household population 10 years old and over was registered at 86.79 percent, an increase of 0.74 percentage point within a ten-year period, the females accounting for 43.72 percent and the males, 43.07 percent. However, the literacy rate for the male population was slightly higher than the females, 87.99 percent for the former and 85.64 percent for the latter.

The easy access of urban residents to more schools afforded them to have a higher proportion of literates than their rural counterpart, 90.96 percent as compared to 85.25 percent.

LANGUAGE OR DIALECT

Diversity in languages and dialects spoken is prevalent in the 46 municipalities and 2 cities of the province with Pangasinan as the dialect generally spoken by 141,184 private households or 48.23 percent of all private households. Ilocano at 48.13 percent is the next widely spoken dialect. Very few households speak other dialects such as: Zambal (Bolinao), 2.04 percent; Tagalog, 1.23 percent and others, 0.37 percent.

GAINFUL OCCUPATION

Gainful workers 15 years old and over in Pangasinan total 428,930 or 45.55 percent of the total number of persons 15 years old and over. Persons without gainful activities are mostly females (78.52%) who are tied up to housekeeping.

A great majority of the population are employed as agricultural, animal husbandry and forestry workers, fishermen and hunters (52.49%). The rest are: production and related workers, transport equipment operators and laborers (20.01%); professional, technical and related workers (7.18%); sales workers (7.13%); service workers (6.76%); clerical and related workers (3.11%) and administrative, executive and managerial workers (0.32%). Workers not classifiable by occupation aggregate 3.00 percent.

Clerical and related workers, service workers, and workers not classifiable by occupation continue to register increases in their respective proportions. On the other hand, decreases in proportions are incurred by administrative, executive, and managerial workers together with production and related workers, transport equipment operators and laborers. Proportions characterized by up-and-down pattern are noted for the rest of the workers.

TABLE E — GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, PANGASINAN: 1970, 1975 AND 1980

Major Occupation	19	980	19	75	1970		
Group	Number	Percent	Number	Percent	Number	Percent	
Total	428,930	100.00	381,793	100.00	394,773	100.00	
Professional, technical and related workers	30,812	7.18	23,045	6.04	29,142	7.38	
Administrative, executive and managerial workers	1,356	0.32	2,464	0.65	3,084	0.78	
Clerical and related workers	13,356	3.11	10,614	2.78	7,648	1.94	
Sales workers	30,566	7.13	30,735	8.05	27,624	7.00	
Service workers	28,975	6.76	23,803	6.23	23,996	6.08	
Agricultural, animal husbandry and forestry workers, fishermen and hunters	225,160	52.49	206,220	54.01	208,793	5,2.89	
Production and related workers, transport equipment operators and laborers	85,829	20.01	77,725	20.36	89,881	22.77	
Workers not classifiable - by occupation	12,876	3.00	7,187	1.88	4,605	1.16	

TYPE OF BUILDING

Majority (97.44%) of the 292,728 households in the province are occupying single houses. The rest are living in duplex (0.68%), apartment/accesoria/condominium/row house/etc. (0.43%), improvised or barong-barong (1.08%), commercial/industrial/agricultural (0.33%) and other types of structures (0.04%).

Most of the households living in single houses are in the rural areas (74.46%); only 25.54 percent are in the urban areas. Similarly, a greater proportion of households living in improvised structures (62.35%) and other housing unit such as natural shelter, boat, etc. (77.27%) are mostly rural dwellers. In contrast, more urban households are occupying duplex (50.30%), apartment/accesoria/condominium/row house/etc. (74.96%), commercial/industrial/agricultural buildings (88.43%), hotel, lodging house, dormitory, etc. (75.00%), institutional (85.20%) and other collective living quarters such as military camp, etc. (66.67%).

The table below provides insight into the housing conditions of households in Pangasinan during the two censal years:

TABLE F – NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, PANGASINAN: 1970 AND 1980

Type of Building	19	80	1970		
	Number	Percent	Number	Percent

Other collective living			~,	0.01	
quarters (military camp, etc.)	15	0.01	_		

TYPE OF OCCUPANCY

Of the total number of households, 269,326 or 92.01 percent are owners of their occupied dwelling units. The rest of the households are either tenant or lessee (3.19%), subtenant or sublessee (0.20%), or rent-free occupant (4.60%). Majority of both the urban (86.96%) and the rural (93.80%) households are living in owner-ocupied dwelling units (Table 1).

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Approximately 55.20 percent of the total households have the roof of their dwelling units constructed of strong materials (galvanized iron, tile/concrete/brick/stone and asbestos) and 44.80 percent of light materials (cogon or nipa, makeshift or salvaged materials and other such as anahaw, etc.). Of the urban households, 64.53 percent occupy dwelling units with roof of strong materials and 35.47 percent of light materials. More rural households have dwelling units with roofs of strong materials (51.88%) than of light materials (48.12%).

Outer walls of light materials (bamboo/sawali, cogon/nipa, makeshift/salvaged materials and other such as anahaw, etc.) are used by over half (55.82%) of the total households. This also holds true for households in the rural areas where 61.95 percent live in dwelling units with outer walls built of the same materials. On the other hand, a higher proportion of the urban households (61.38%) reside in dwelling units with outer walls built of strong materials (galvanized iron or aluminum, tile/concrete/brick/stone, wood or plywood, mixed tile/concrete/brick/stone and wood/plywood, and asbestos) than of light materials, 38.62 percent (Table 2).

YEAR BUILT

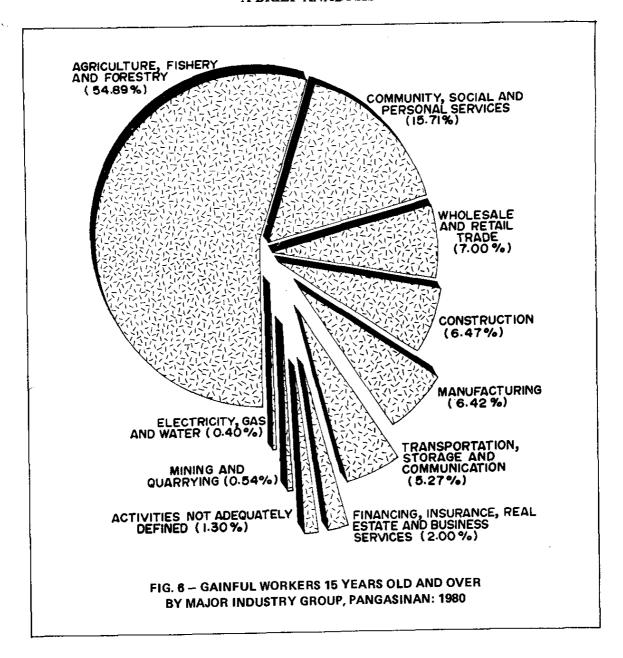

Less than one-third or 30.93 percent of the total households are occupants of dwelling units built in 1976-1980; 24.10 percent, during 1971-1975; 24.28 percent, 1961-1970; 12.48 percent, 1951-1960; 4.59 percent, 1942-1950 and 3.62 percent, before World War II or 1941 or earlier (Table 2).

FLOOR AREA OF DWELLING UNIT

Most of the households (53.50%) occupy dwelling units with floor area less than 30 square meters. About 29.65 percent live in 30-49 square meter dwelling units and 8.40 percent, in units of 50-69 square meters. A few households have more spacious dwelling units with floor area ranging from 70-99 square meters (4.91%); 100-149 square meters (2.00%) and 150 square meters and over (1.54%).

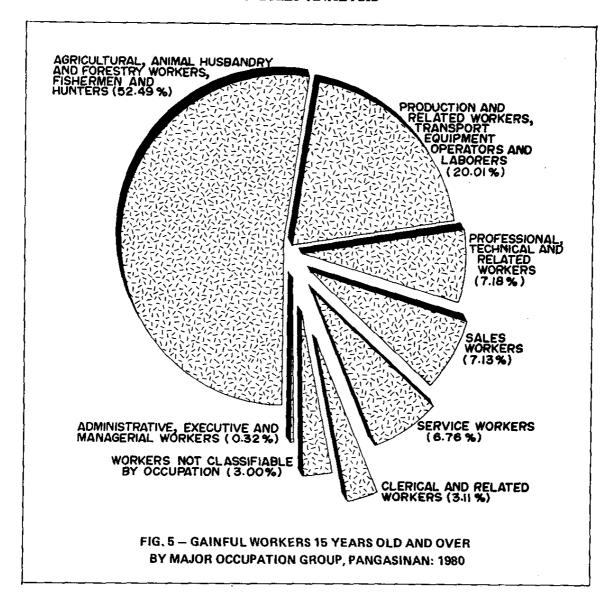

TENURE OF OWNER OCCUPANT WITH RESPECT TO THE LAND

Of the 269,326 households in owner-occupied dwelling units, 75.23 percent also own the land where the structure is erected. The remaining proportions are as follows: 6.16 percent, lessee or sublessee; 6.10 percent, farm lessee or agricultural tenant of landowner and 4.04 percent, other legal tenure. Approximately 8.47 percent have no tenure (squatter, etc.) to the land where their dwelling units stand (Table 4).

MIGRATION

Out of 1,385,234 persons of the private household population 5 years old and over, 97.14 percent resided in the same city or municipality where they had lived on May 1, 1975. Only 1.55 percent were then residing in other cities or municipalities within Pangasinan province (intra-provincial migrants) and 1.18 percent were residing in another province (interprovincial migrants). A negligible percentage of the population (0.13%) were residents of other countries. The females outnumbered the males in terms of intra-provincial migration (0.84% females; 0.71% males) and inter-provincial migration (0.64% females; 0.54% males). Those who resided in foreign countries on May 1, 1975 were composed of 0.06 percent males and 0.07 percent females (Table 10).

INDUSTRY

More than one-half or 54.89 percent of the total gainful workers in the province are engaged in agriculture, fishery and forestry. Agricultural crops producers chiefly comprise this group (89.70%). Trailing far behind are workers in fishery (7.83%) and producers of live-stock, poultry and other animals (1.19%). About 15.71 percent are engaged in community, social and personal services, with the personal and household services (36.77%), education services (31.51%) and public administration and defense (16.78%) serving as the workers' principal concentrations. The wholesale and retail trade contributes only 7.00 percent and manufacturing industry, 6.42 percent. About 6.47 percent are in construction. Very few are engaged in transportation, storage and communication (5.27%) and financing, insurance, real estate and business services (2.00%). Industries with the least number of workers are mining and quarrying with 0.54 percent and electricity, gas and water with 0.40 percent (Table 9).

KIND OF LIGHTING FACILITIES

Kerosene is the most widely used type of lighting facility in the province with 62.30 percent of the total households using it. Only 34.52 percent use electricity; 2.81 percent, liquefied petroleum gas (LPG); 0.08 percent, oil and 0.29 percent, others such as candles or wax. A higher percentage of urban households use electricity for lighting than those in rural places, 60.45 percent against 25.28 percent. In the rural areas, kerosene is used by majority (71.35%) of the households (Table 5).

SOURCE AND USE OF WATER SUPPLY

Most households (40.95%) in this province depend on tubed or piped shallow well as their source of drinking water while 36.13 percent utilize water from tubed or piped deep well and 13.38 percent from the faucet, community water system. Only 8.13 percent get their drinking water from dug well; 1.34 percent, from spring; 0.06 percent, from lake, river, stream, irrigation, etc. and an insignificant 0.01 percent, from rain.

For kitchen use and for washing clothes, most of the households, likewise, depend on tubed or piped shallow and deep wells and faucet, community water system, as their main sources of water supply. About 41.61 percent of the households use water from tubed or piped shallow well for kitchen use and 39.84 percent, for washing clothes. For the same purposes, tubed or piped deep well is used by 35.33 percent and 34.35 percent, respectively, and faucet, community water system, by 12.34 percent and 11.82 percent. A small percentage use the dug well (9.27% for kitchen use, 9.12% for washing clothes) and water from spring (1.35% and 1.27%). While only 0.08 percent rely on lake, river, stream, irrigation, etc. for their kitchen needs, 3.58 percent utilize water from these sources for washing clothes (Table 6).

TYPE OF TOILET FACILITIES

The water-sealed with other depository type of toilet facility is used by less than one-half (45.67%) of the total households. About 21.86 percent use water-sealed with sewer/septic tank; 16.78 percent, closed pit (antipolo, etc.); 10.28 percent, open pit; 0.08 percent, other (pail system, etc.); while 4.73 percent have no toilet facilities. For both urban and rural households, the most preferred type of toilet facility is the water-sealed with other depository (urban -43.05%; rural -46.60%). However, more households in the rural areas (4.84%) are without toilet facilities compared to 4.44 percent of the urban households (Table 7).

COOKING FUEL

Wood or charcoal is still the most common kind of cooking fuel in the province. About 85.39 percent of the total households use either wood or charcoal for cooking while 5.82 percent use kerosene, compared to 89.51 percent and 4.56 percent, respectively, in 1970. Although only 5.44 percent use liquefied petroleum gas, the proportion is 1.62 percentage points higher than in 1970. As in the past decade, very few households use electricity (1.39%) and other kinds of cooking fuel (1.96%). Wood or charcoal is widely used in both the urban and rural areas although a higher percentage is observed in the latter (88.82%) than in the former (75.75%) (Table 8).

xxxiii

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

More than two-thirds (69.33%) of the households in Pangasinan own radios; nearly one out of seven (15.02%) have television sets while less than one-tenth (9.20%) have refrigerators or freezers. Ten years ago, only 57.99 percent of the households had radios; 1.71 percent, television sets and 2.71 percent, refrigerators. Comparatively, a higher proportion of households own these appliances in the urban than in the rural areas. Of the urban households, 72.78 percent own radios; 29.49 percent, television sets and 20.49 percent, refrigerators or freezers. Among the rural households, 68.10 percent have radios; only 9.87 percent own television sets and 5.18 percent, refrigerators or freezers (Table 9).
